

The graph displays the percentage of the population in the United States with a positive COVID-19 antibody response over time. The x-axis represents months from February 2020 to May 2021. The y-axis represents the percentage, ranging from 0 to 100. A red line shows the data from February 2020 to the end of 2020, while a teal line shows the data from July 2020 to May 2021. The red line starts at approximately 95% in February 2020, drops sharply to about 25% by April, and then fluctuates between 25% and 55% through the end of 2020. The teal line starts at approximately 95% in July 2020 and remains constant through May 2021.

Month	Percentage (%)
Feb 2020	95
Mar 2020	95
Apr 2020	25
May 2020	25
Jun 2020	25
Jul 2020	25
Aug 2020	25
Sep 2020	25
Oct 2020	25
Nov 2020	55
