

The graph displays the daily count of COVID-19 cases in the United States. The red line represents the period from February 2020 to June 2021, showing a significant initial drop in March 2020, followed by a period of fluctuation with peaks in November 2020, January 2021, and March 2021. The teal line represents the period from July 2021 to May 2022, showing a sharp increase in June 2021, followed by a steady decline.

Current = 42 %

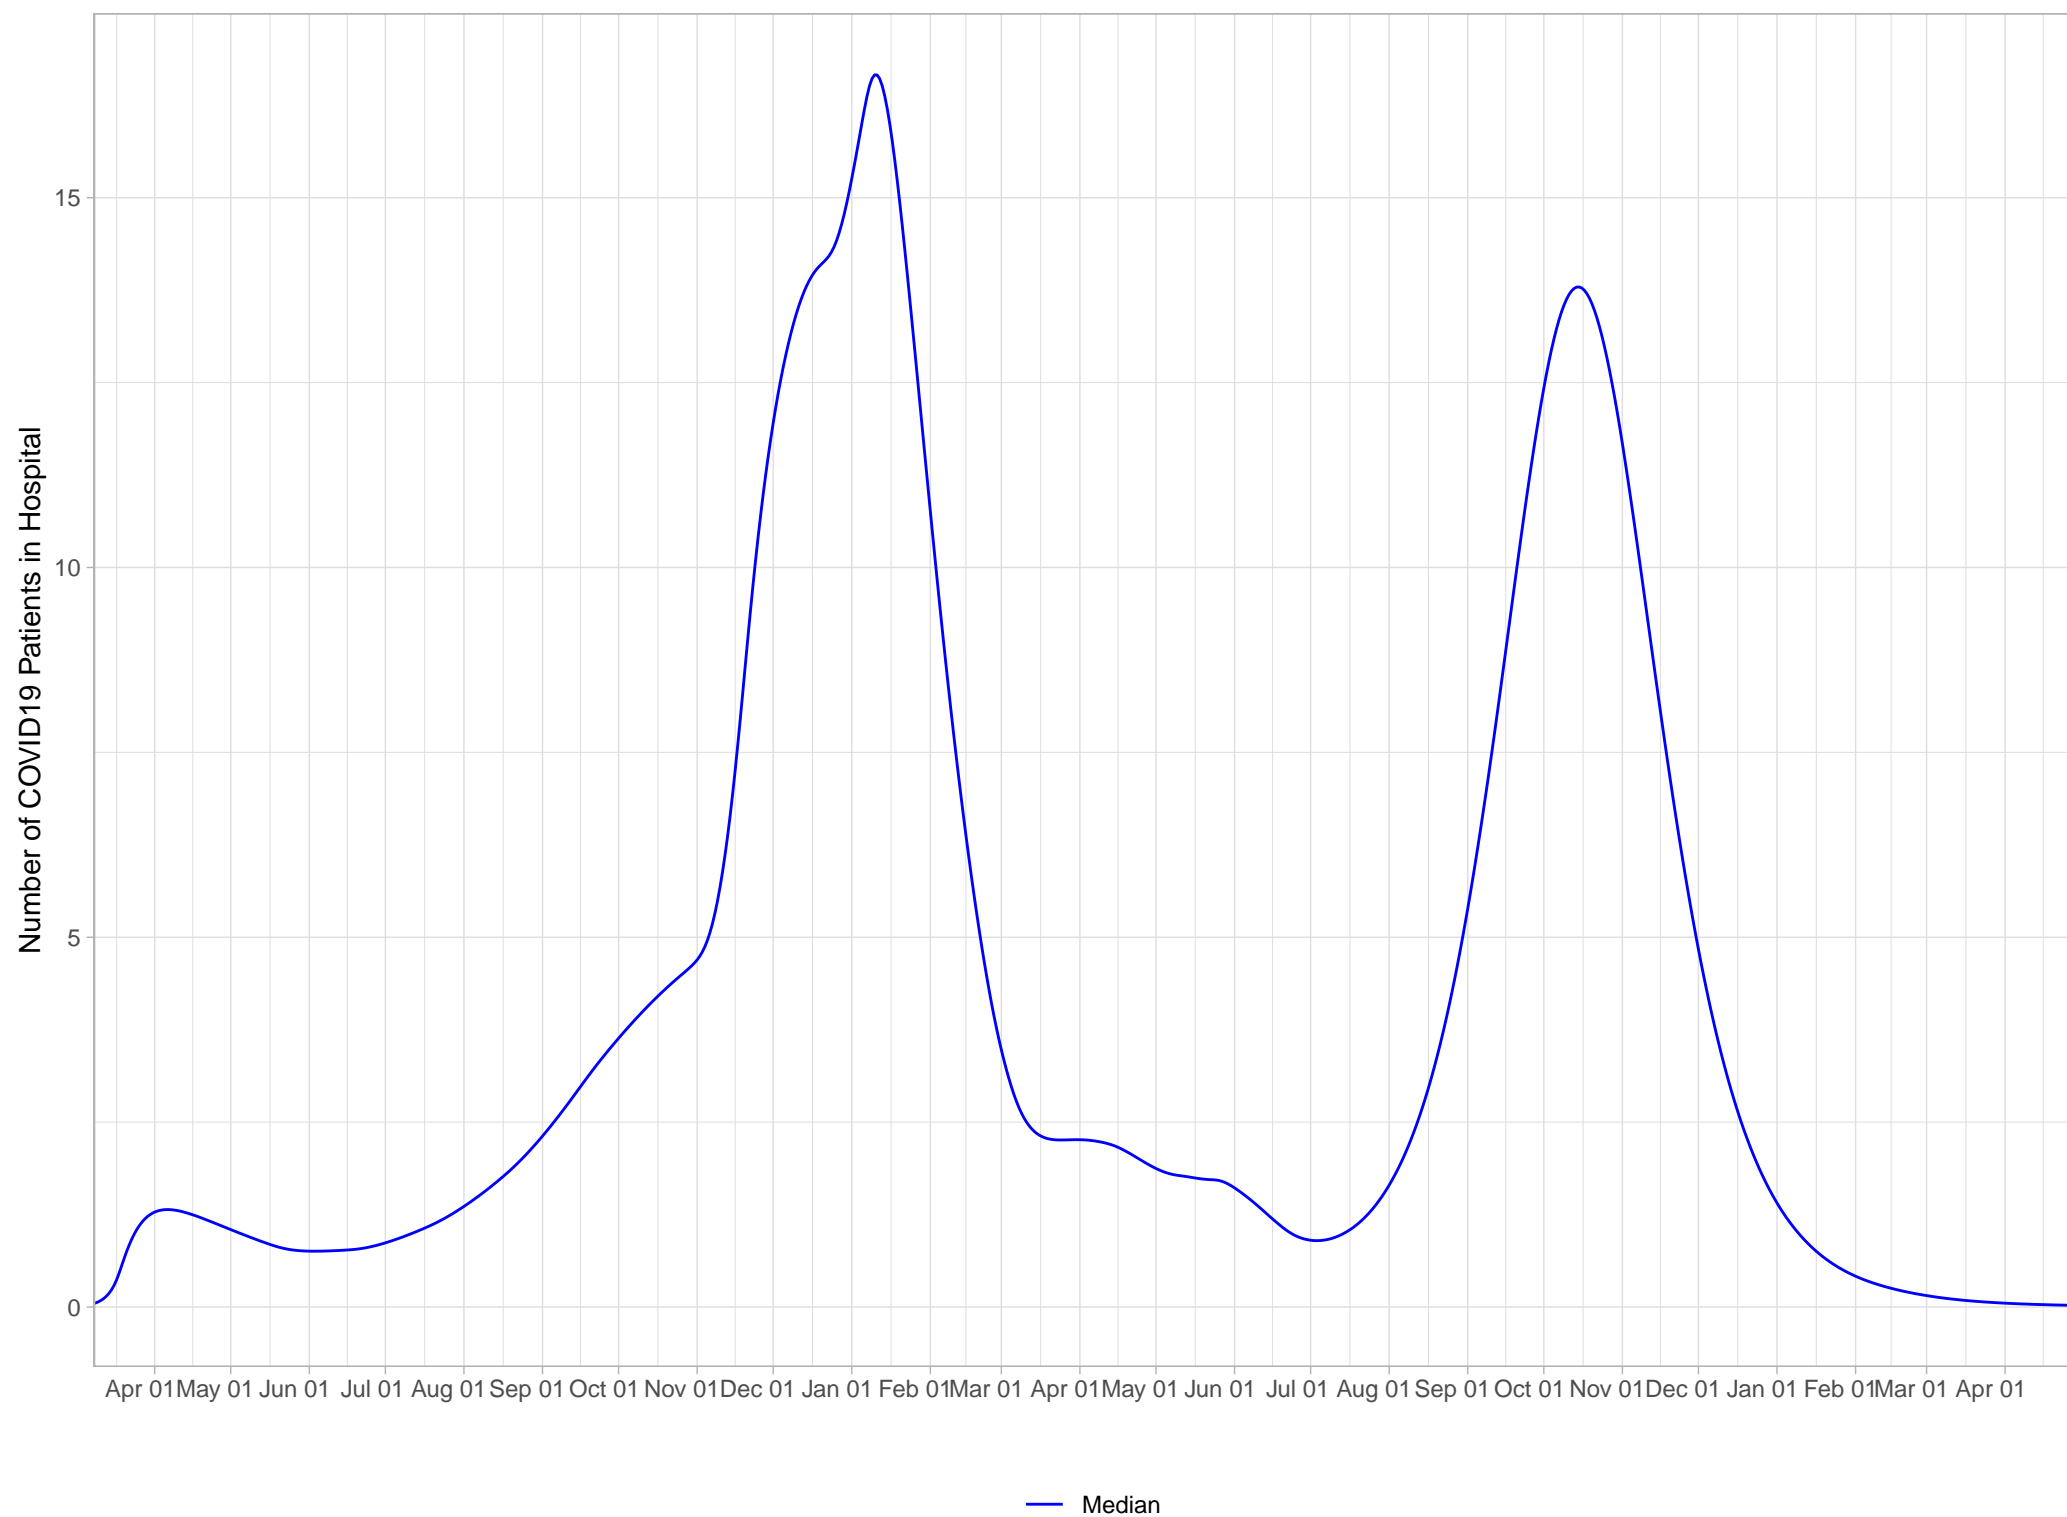

# Actual and Projected Vaccines Doses

note: scattered doses in the summer are wrapping up second doses, later doses are children
